Spool File Viewers For Your IBM i Applications

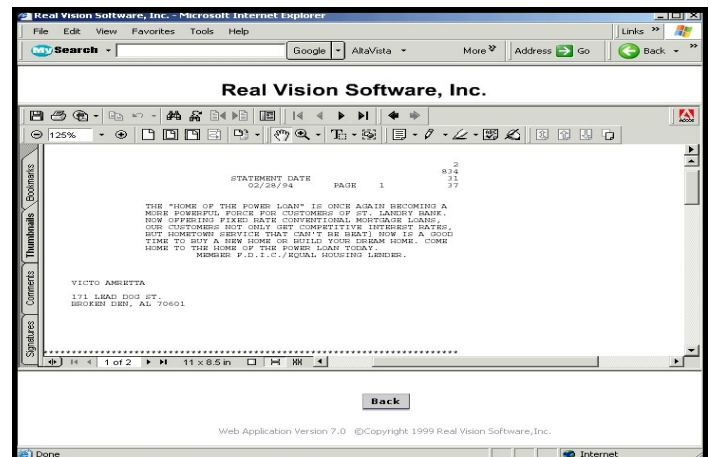

RVI ADVANCED IBM i SPOOL FILE VIEWER

This viewer offers all the advanced viewing capabilities needed to work with captured spool file reports. This viewer can be used on any PC or terminal that has access to an IBM i application, based on the users security.

RVI PC GUI SPOOL FILE VIEWER

This viewer offers the same functions as the RVI Advanced IBM i Spool File Viewer. The user may choose the font size, color and style as well as the paper bar color for the report being viewed.

WEB APPLICATION SPOOL FILE VIEWER

This RVI Web Viewer using Internet Explorer is provided as part of the Spool File or Complete Imaging System. This viewer option displays the spool file in the Adobe PDF Viewer inside the RVI Viewer.
