

RVI for Windows

Document Management Solution

rvoffice@realvisionsoftware.com • 318.449.4579 • www.realvisionsoftware.com

Real Vision Software's RVI for Windows Solution!

RVI's open system document management solution complements the IBM i solution that has served the imaging needs of customers since 1992.

RVI expands the imaging world for existing and future RVI customers. The RVI for Windows System is the same feature rich solution originally developed for the IBM i that now supports applications using non-IBM i platforms.

RVI for Windows

Installation / Training: Based on required Scope of Work
 Conversion Fee: TBD, based on the Scope of Work for the RVI database conversion.
 Support Fee: TBD, based on the RVI for Windows License converted to.

Note:

1. If optical libraries are used for data storage, RVI custom code and customer interaction will be required to accomplish the actual data migration **prior** to installation to a Windows platform. This can be very time consuming depending on the number of optical cartridges involved.
2. All custom code must be evaluated to determine if the RVI for Windows System can perform the same functions.
3. RVI Basic or Spool file customers **must** purchase the upgrade to RVI Complete to use the new RVI for Windows application.
4. Customer spool file needs must be evaluated and sample data tested.
