- Flexible storage / archival options
- Designed for IBM i, Windows & Cloud

### Read what an RVI customer had to say...

*"Real Vision Imaging Systems has been our imaging solution since their inception. It is important for us to protect filed documents. Daily, through the RVI software, we scan the filed documents making them available for viewing, which reduces the handling of the originals. We have confidence that our documents captured through RVI can, and always will be capable of being retrieved. The support and staff at RVI are always professional, courteous, and prompt."*

**Rapides Parish Clerk of Courts**  
★★★★★★★★★★

*"A product, whether it is hardware or software, is only as good as the maintenance or support provided by its company. The support staff at Real Vision is always available to solve any problem that may arise whether it is a network problem that affects the use of their software or simply a user issue. They are very knowledgeable of their product and always correct problems in a very timely manner. Real Vision software has been a very useful tool in our office providing us with imaging and scanning ability and I would recommend this company to anyone in search of imaging software."*

**Titus County**  
★★★★★★★★★★

*"The RVI Image System has made it so easy for Management to view any purchase order, invoice or check from our SunGard Navaline GMBA System. There is no requesting assistance by a clerk, you can merely sit at your desk and review as if it was a paper file. This system has been a God send to Financial Managers and Budget Specialist. We have used the RVI system for the past 10 plus years and each year the upgrades have made it better and better."*

**Midland County**  
★★★★★★★★★★

*"Mendocino County California has been an RVI customer for over 10 years. We have utilized the system to image and store Assessor's property data, the County's invoices and contracts, Planning Department documents, and case files for the District Attorney and Public Defender. It has become a very valuable asset at a very low cost of ownership. RVI's support staff is nothing short of "stellar." We are always able to get through to them in a timely fashion and their ability to "remote in" has enabled RVI to solve every challenge we have ever presented."*

**Mendocino County**  
★★★★★★★★★★

*"RVI has been a part of our operations since 2000. It has helped so many departments save time looking for documents, not to mention all the space that has been saved by eliminating rows of filing cabinets. Our employees love not having to get up and search for documents, its available right at their desk. The updates seem to always have new features that are helpful. The staff is always courteous and prompt."*

**Houston County**
