- Internet / Mobile application support
- Ability to deliver documents as PDF's
- Workflow capabilities
- 15% support fee includes new releases
- Flexible storage / archival options
- Designed for your IBM I, Windows & Cloud

Homewood
Improving Life

"We began using RVI almost 10 years ago. Through the years we've found ways to improve our processes by taking advantage of RVI's scanning and spool file capturing ability, implementing automatic report distribution and setting up browser viewing capabilities to the point where RVI is now one of our core applications. RVI's support staff is great to work with and always go above and beyond to help us find ways to better integrate the software into our systems."

**TAHOE
FOREST
HEALTH
SYSTEM**

As a small rural Health System, Real Vision (RVI) software has helped us to achieve a document management system that we could not otherwise afford. With the use of RVI, we have reduced paper costs, reduced space requirements for records and nursing staff costs to track down records. We have been able to bring our patient and financial documents real time to the right people with the proper security levels. This has helped us expedite our patient's treatment and care. The level of customer service is excellent, far above many of our vendors. RVI is one of the best investments we have made.

Andrews Center has been a Real Vision customer for over 10 years. The RVI products have allowed us to reduce the amount of printing and dependency on paperwork dramatically over the years in every aspect of our business, especially with the elimination of the paper medical charts. The support staff can't be beat, always above and beyond. RVI software is very reliable and cost effective and easy to implement and maintain. Thanks Real Vision.

"It has provided excellent access to reports and documents. The savings in paper has paid for the system. Users having access to all documents is outstanding."
