Real Vision Imaging (RVI) Cloud:

RVI Cloud is a hosted document imaging solution for customers interested in a non-premises option. Digitized documents are stored in one of the most physically secured sites in the nation designed to meet US Department of Defense anti-terrorism force protection codes. All images / data are backed-up and replicated to a similar site ensuring documents are archived and protected. Users have secured 24x7 access to just your company data and only those documents they are authorized to retrieve.

RVI Cloud supports the capture of scanned paper documents and imported PC files (word processing, spreadsheets, emails, audio-visual, PDF print output and more). Digitized documents can be securely accessed from the office, over the web or even from a mobile device. Documents are delivered as PDFs in the RVI OneLook (browser) interface.

RVI Cloud uses pay-as-you-grow pricing. Monthly subscription rates are based on capacity usage starting at 100 GB with additional storage available in 100 GB increments. The monthly subscription fee includes unlimited RVI users and technical support.

RVI Cloud has most of the same capabilities as our on-premises solutions. A capture system, advanced workflow, security, detail audits, eSignature support, mobile apps and a screen-scrape utility to develop interfaces with your applications are all included.

RVI Cloud uses an extra layer of security protection (Company Code) in addition to the 5 standard levels of security controls provided in the base product. Also, the host provider uses data encryption when delivering documents from their servers.

In addition to providing a safe / secure environment for storing documents, a hosted solution offers other advantages over on-premises approaches. Up-front hardware investment is minimized, IT maintenance requirements are reduced, and deployment is easier across a wide variety of users / locations / devices.

Some of the key highlights of the RVI Cloud solution are as follows:

- Hosted RVI solution (data replicated to similar site)
- Pay-As-You-Grow pricing (in 100 GB increments)
- Monthly subscription includes RVI technical support
- Unlimited RVI users / no add-on modules
- Expandable to multiple applications / departments
- 99 unique indexes per application / department
- Capture system included (optional OCR extraction)
- Microsoft integration (Send-To-RVI plug-in)
- PC file imports (virtual print driver / drag & drop)
- Security controls (plus Company Code layer)
- Detailed audits / counts (graphical options)
- Advanced workflow / approval system included
- eSignature support (signature pads / mobile devices)
- OneLook user interface / PDF delivery options
- Integration - program calls / screen scrape utility
- Mobile apps for Apple / Android devices

With RVI, it's never complicated or expensive and we provide the installation & training resources to bring it all together for your paperless office project. Call one of our certified document imaging specialists to discuss your requirements or to schedule an RVI demo:

Real Vision Imaging (RVI) Cloud:

Hosting Company:	CMA Technology Solutions (Baton Rouge, LA) www.cmaontheweb.com
CMA Contact:	Kyle Rogers, Solution Specialist 225-927-9200 x456 krogers@cmaontheweb.com
RVI Contact:	John Paul Roundtree, Marketing Director 318-449-4579 x107 johnpaul@realvisionsoftware.com
Base Offering:	Customer data and images are stored in a Tier IV data center located in the central US region designed to Department of Defense anti-terrorism force protection codes and is physically one of the most secure commercial sites in the nation. Backup and replication are also stored in a similar site in the western US region. You can have peace of mind that your data is securely stored and available.
License Terms:	Two license agreements are signed by the customer. Real Vision Software is the developer, owner and support provider for the RVI Cloud software which requires one license & support agreement. CMA Technology Solutions provides / hosts the hardware environment for the RVI Cloud system and customer data and requires a separate license & support agreement.
License Fees:	RVI Cloud is available for a monthly subscription fee with two components. Real Vision Software charges $475 monthly (includes support) to license the RVI Cloud software. CMA Technology Solutions charges a monthly core hosting fee for each 100 GB of capacity used for customer data. The initial 100 GB is $325 monthly with an additional $100 monthly charge per additional 100 GB increment required.

$475	RVI Cloud monthly subscription charge
$325	CMA core monthly hosting fee (initial 100 GB)
$800	Total RVI Cloud monthly subscription (initial 100 GB)
$100	CMA core monthly hosting fee (per additional 100 GB increment)

Fee Examples:

Capacity	RVI Cloud	CMA Hosting	Total Subscription
100 GB	$475	$325	$800 monthly
200 GB	$475	$425	$900 monthly
500 GB	$475	$725	$1,200 monthly
1,000 GB	$475	$1,225	$1,700 monthly

High Availability:	The RVI Cloud base offering includes backup of data / images. Replication to the CMA High Availability site is also available through special bid with CMA.
